

MOHAMED ZIDAN

Junior Flutter Developer

mohamed.zidanx99@gmail.com • +20 121 056 0229 • Suez, Egypt • linkedin.com/in/mohamedxzidan • github.com/muhamedxzidan • muhamedxzidan.github.io

PROFESSIONAL SUMMARY

Junior Flutter Developer with proven experience building and shipping cross-platform applications across **Mobile (Android/iOS)**, **Windows Desktop**, and **Web**. Proficient in **Clean Architecture (MVVM)**, **BLoC/Cubit**, and integrating real-time backends (**Firestore**, **Supabase**). Track record deploying production applications to **Google Play** and live cloud hosting, with strong focus on performance, responsive UI, and clean, maintainable code.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter (Android, iOS, Web, Windows Desktop), Astro, JavaScript, HTML5, CSS3, OOP, SOLID Principles.

Architecture & State Management: Clean Architecture (MVVM), Feature-First Modular Design, BLoC / Cubit, Repository Pattern, Dependency Injection (GetIt).

Backend, Cloud & Databases: Firebase (Cloud Firestore Streams, Authentication, Hosting, Storage), Supabase (Realtime, Auth), Isar, Hive, SQLite.

Networking, DevOps & Tools: RESTful APIs, Dio, Git / GitHub (GitFlow, PRs), Postman, Google Play Console, CI/CD, AI-assisted engineering.

WORK EXPERIENCE

Freelance Flutter Developer — Self-Employed

2026 – Present

Cross-Platform Software Engineering & Deployment

Remote · Suez, Egypt

- Architected and deployed multi-platform production apps (Mobile, Web, Desktop) for enterprise clients and businesses.
- Integrated real-time cloud services using **Firestore & Supabase** with secure role-based access control (RBAC).
- Built high-performance, SEO-optimized web platforms delivering fast Core Web Vitals and automated WhatsApp lead flows.

Flutter Developer Trainee — EraaSoft

11/2025 – 04/2026

Professional Software Development Track

Remote · Cairo, Egypt

- Built production-standard Flutter applications applying **MVVM Clean Architecture** and **BLoC/Cubit** state management.
- Engineered resilient REST API integration pipelines with Dio, JWT token refresh interceptors, and offline caching.

FEATURED PROJECTS

Vaygoo — On-Demand Tourism Booking Ecosystem

2026 – Present

Live Web: www.vaygoo.com | **Google Play:** [Google Play Store](https://play.google.com/store/apps/details?id=com.vaygoo)

- Published a production travel booking ecosystem featuring a mobile customer app and web management portal.
- Integrated **Supabase Realtime** for live booking status, Google & Facebook OAuth, and **Google Maps** geolocation.
- Collaborated in a remote engineering team adhering to **GitFlow**, pull-request reviews, and Clean Architecture with Cubit.

Laundry SaaS Platform — Multi-Tenant Management System

2026

Multi-Platform Ecosystem (Super Admin Web + Cashier Panel + Delivery Mobile App)

Production SaaS

- Engineered a multi-tenant SaaS platform managing branch subscriptions, staff roles, and order fulfillment.
- Built live order dispatching powered by **Cloud Firestore Real-time Streams** for instant cashier updates without reload.
- Automated digital invoicing with instant, pre-formatted customer delivery receipts dispatched directly via WhatsApp.

Clean Code Laundry — Commercial Astro Web Platform

2026

Live Website: cleancode-laundry.com

- Designed and built a fast commercial web platform utilizing **Astro Islands Architecture** (Zero-JS by default).
- Implemented an interactive client-side **Carpet Price Calculator** for real-time area (L × W) and discount validation.
- Integrated automated WhatsApp lead generation and structured **LocalBusiness Schema.org** SEO markup.

EDUCATION & CERTIFICATIONS

Flutter Developer Diploma — EraaSoft

11/2025 – 04/2026

Comprehensive Cross-Platform Software Engineering Track

Remote · Cairo, Egypt

- Completed intensive engineering coursework covering Dart, OOP, Clean Architecture (MVVM), BLoC/Cubit, REST APIs, and Firebase.

Code Smarter With AI — Professional Certificate

08/2026

Instructor: Eng. Usama Elgendy · Software Engineer

18 Training Hours

- Trained on modern AI-assisted workflows: prompt engineering, automated debugging, and architectural code refactoring.
