

MOHAMED ZIDAN

Flutter Developer | Mobile, Desktop & Web

mohamed.zidanx99@gmail.com • +20 121 056 0229 • Suez, Egypt • [linkedin.com/in/mohamedxzidan](https://www.linkedin.com/in/mohamedxzidan) • github.com/muhamedxzidan • muhamedxzidan.github.io

PROFESSIONAL SUMMARY

Results-driven **Flutter Developer** specialized in architecting and delivering scalable, high-performance cross-platform applications across **Mobile (Android/iOS)**, **Windows Desktop**, and **Flutter Web**. Expert in **Clean Architecture (MVVM)**, **BLoC/Cubit** state management, and building responsive, accessible UIs. Proven track record deploying live production apps to **Google Play** and web cloud infrastructure (**Firebase, Supabase**), implementing real-time data sync, atomic stock engines, and automated business workflows. Proficient in leveraging **AI-assisted software engineering** (prompt engineering, automated code refactoring, intelligent debugging) to maximize code maintainability, velocity, and delivery quality.

TECHNICAL SKILLS

Frameworks & Core: Flutter (Android, iOS, Web, Windows Desktop), Dart, OOP, SOLID Principles, Data Structures, Asynchronous Programming (Streams, Async/Await).

Architecture & State Management: Clean Architecture (MVVM), Feature-First Modular Design, BLoC / Cubit, Repository Pattern, Dependency Injection (GetIt).

Backend & Cloud Platforms: Firebase (Cloud Firestore, Authentication, Firebase Hosting, Cloud Storage, Security Rules), Supabase (Auth, Realtime Streams, Storage, RPC Functions).

Networking & Offline Storage: Dio HTTP Client, Interceptors, RESTful APIs, Offline-First Architecture, Isar, Hive, SQLite, Encrypted Storage (Flutter Secure Storage).

Web & UI/UX Engineering: Flutter Web SEO (seo, meta_seo), Responsive Layouts (flutter_screenutil), Custom Paint, Rive Animations, Skeleton Loading (Skeletonizer).

DevOps, Tools & AI Workflows: Git, GitHub Actions CI/CD, GitFlow, Postman, VS Code, Google Play Console, AI-assisted engineering (Claude Code, Cursor, Prompt Engineering).

WORK EXPERIENCE

Freelance Flutter Developer — Self-Employed

2026 – Present

Cross-Platform Software Engineering & Deployment

Remote · Suez, Egypt

- Architected, developed, and deployed multi-platform production apps (Mobile, Web, Desktop) for enterprise clients and businesses.
- Engineered real-time cloud integrations using **Firebase & Supabase** with secure multi-tenant role-based access control (RBAC).
- Delivered pixel-perfect, SEO-optimized web platforms with dynamic OpenGraph meta engines, boosting search discoverability and conversion rates.

Flutter Developer Trainee — EraaSoft

11/2025 – Present

Professional Software Development Track

Remote · Cairo, Egypt

- Developed production-level Flutter applications utilizing **MVVM Clean Architecture** and **BLoC/Cubit** under senior engineering mentorship.
- Implemented robust RESTful API integration pipelines with token refresh interceptors, automated error handling, and offline caching.

FEATURED PROJECTS

Vaygoo — On-Demand Tourism & Excursion Booking Platform

2026 – Present

Live Web: www.vaygoo.com | **Google Play:** play.google.com/store/apps/details?id=com.vaygoo.travel

- Built a full-featured cross-platform ecosystem (Google Play App + Web Portal + Admin Dashboard) for on-demand safari and excursion bookings.
- Integrated **Supabase Realtime** for instant booking updates, provider payout management, and bilingual localization (Arabic/English).
- Engineered OAuth authentication (Google & Facebook), **Google Maps** geolocation API, and Clean Architecture with Cubit state management.
- Led collaborative team development using **GitFlow**, PR workflows, automated linting, and strict code review standards.

Makhzani — Enterprise Multi-Warehouse & Inventory Audit ERP

2026 – Present

- Architected an enterprise-grade ERP system for multi-branch stock control, catalog management, supplier returns, and physical audit sessions.
- Engineered an **Atomic Stock Engine** with real-time inventory balances, low-stock threshold triggers, and zero negative-balance risks.
- Built a **Physical Inventory Audit** module calculating instant variance between counted stock and system balances with one-click reconciliation.
- Implemented offline-first caching via **Isar & SharedPreferences**, Clean Architecture with **Bloc/Cubit**, and thermal receipt printing.

Miss Safaa — Interactive Educational Platform (Flutter Web)

2026

Live Platform: miss-safaa.web.app

- Built and deployed a production **Flutter Web** educational platform showcasing interactive children's learning publications.
- Engineered an advanced **SEO & OpenGraph engine** using `meta_seo` and `seo` for dynamic meta tags and search engine indexing.
- Implemented 100% responsive multi-viewport layouts via `flutter_screenutil` adaptable to mobile, tablet, and desktop screens.
- Integrated smooth scroll animations with `visibility_detector` and automated WhatsApp order dispatching on **Firebase Hosting**.

Multi-Branch Laundry Management SaaS Platform

2026

- Engineered a full-stack multi-branch SaaS platform comprising 4 integrated clients: Windows POS app, Admin panel, Owner dashboard, and Driver app.
- Implemented real-time bidirectional data synchronization via **Cloud Firestore**, automated WhatsApp billing, and treasury ledger reports.

Bookia — Online Bookstore Mobile Application

03/2026 – 05/2026

- Developed a modular bookstore app following Feature-First Clean Architecture with Cubit (Catalog, Wishlist, Cart, Checkout, Order Tracking).
- Integrated RESTful APIs via **Dio** with JWT token refresh interceptors and comprehensive status-code error handling.
- Implemented encrypted local storage with `flutter_secure_storage` and integrated fluid **Rive** vector animations.

Taskati — Offline Productivity & Task Management App

12/2025 – 2026

- Engineered an offline task scheduler featuring local database persistence with **Hive**, custom date/time pickers, and clean modular UI.

EDUCATION & CERTIFICATIONS

Code Smarter With AI — Professional Certificate

08/2026

Instructor: Eng. Usama Elgendy (Software Engineer)

18 Total Hours

Completed intensive specialized training on AI-assisted software engineering, focusing on developer prompt engineering, AI-driven code refactoring, intelligent automated debugging, and integrating advanced AI workflows to accelerate development lifecycle and code quality.

Flutter Developer Diploma — EraaSoft

11/2025 – 04/2026

Comprehensive Software Engineering Track

Remote · Cairo, Egypt

Completed a comprehensive multi-platform software engineering curriculum covering Dart, OOP, SOLID principles, Clean Architecture (MVVM), BLoC/Cubit, REST APIs, Firebase integration, and cross-platform production deployments.
