SUMMARY

Result-driven **Flutter Developer** specialized in building scalable, production-grade mobile and web applications with **Clean Architecture (MVVM)**, **Cubit/Bloc** state management, and pixel-perfect responsive UI implementation. Strong problem solver with a focus on performance, maintainability, SEO optimization, and translating complex requirements into reliable features. Experienced in integrating REST APIs, Supabase, Firebase, and **deploying applications to Google Play and Web Hosting**. Leverages AI tools (ChatGPT, Claude, Gemini) to accelerate development, automate debugging, and enhance productivity across the software lifecycle.

WORK EXPERIENCE

Freelance Flutter Developer | Self-Employed

2026 – Present

Suez, Egypt

Remote

- Engineered and deployed multi-platform production apps (Mobile, Web, Desktop) for real businesses and clients.
- Built interactive web platforms with SEO engines and integrated real-time backends (Firebase & Supabase).

Eraa Soft

11/2025 – Present

Flutter Developer | Trainee

Remote

- Built real-world Flutter applications using MVVM and Bloc (Cubit) under mentorship.
- Practiced RESTful API integration, secure authentication flows, and clean architecture principles.

EDUCATION

EraaSoft

2025

Flutter Developer Diploma

Remote

Completed an intensive Flutter development track covering Dart fundamentals, UI/UX implementation, state management with Cubit/Bloc, Firebase integration, and building real-world cross-platform applications for mobile, desktop, and web.

PROJECTS

Vaygoo — On-Demand Service & Tourism Platform

2026 – Present

🔗 **Web:** www.vaygoo.com | 📱 **Google Play:** play.google.com/store/apps/details?id=com.vaygoo.travel

- Developed a full-featured cross-platform tourism & service booking platform (Mobile App on Google Play + Live Web Portal + Admin Dashboard) for excursions, safaris, and wellness services.
- Integrated **Supabase** for real-time bookings, provider earnings management, and multi-language support (Arabic & English).
- Implemented **Google & Facebook OAuth**, geolocation via **Google Maps**, and Clean Architecture with Cubit state management.
- Collaborated in an agile team using **GitFlow**, managing feature branches, Pull Requests, and code reviews.

Miss Safaa — Interactive Educational Web Platform

2026

🔗 **Live Website:** miss-safaa.web.app

- Built and deployed a production **Flutter Web** educational platform showcasing children's foundational learning books.
- Engineered a full **SEO & OpenGraph engine** using `meta_seo` and `seo` for dynamic meta tags and search indexing.
- Implemented a pixel-perfect, 100% responsive layout via `flutter_screenutil` adaptable to mobile, tablet, and desktop viewports.
- Utilized **Cubit/Bloc** with `equatable` and integrated `visibility_detector` for smooth scroll-triggered animations and direct WhatsApp order dispatching on **Firebase Hosting**.

Multi-Branch Laundry Management SaaS Platform

2026

- A full-stack SaaS platform for laundry businesses built with Flutter and Firebase, serving multiple branches simultaneously.
- System includes 4 integrated platforms: Windows desktop POS app for cashiers, owner dashboard, web-based admin panel, and delivery agent mobile app.
- Features multi-branch support, real-time data sync via **Cloud Firestore**, automated WhatsApp invoice generation, cashbox tracking, and treasury reports with Clean Architecture.

Bookia — Online Bookstore Mobile App

03/2026 – 05/2026

- Developed a complete bookstore mobile application following Clean + Feature-First architecture with Bloc (Cubit), including Home, Cart, Wishlist, Checkout, and Order History.
- Integrated RESTful APIs using **Dio** with interceptors, token refresh, and comprehensive exception handling for all status codes.
- Implemented secure encrypted token caching with `flutter_secure_storage` and user preferences with `shared_preferences`.
- Enhanced UX with interactive **Rive** animations and smooth skeleton loading indicators (`skeletonizer`).

Taskati — Task Management App

12/2025 – 2026

- Built task scheduling and management features with local offline storage (**Hive**, `shared_preferences`).
- Designed interactive, responsive UI components with date/time pickers and clean component structure based on Figma.

SKILLS

Flutter & Web: Cross-platform development (Mobile, Web, Desktop), Custom Widgets, Animations, Responsive UI (<code>flutter_screenutil</code>), Flutter Web SEO (<code>meta_seo</code> , <code>seo</code>).	Dart & Core: OOP, Async/Await, Streams, JSON Parsing, SOLID principles, Data Structures.
State Management: Cubit, Bloc, BlocListener, BlocBuilder, Equatable.	Architecture & Design: Clean Architecture (MVVM), Feature-First, Separation of Concerns, Repository Pattern, Dependency Injection (GetIt).
Backend & Cloud: Firebase (Firestore, Auth, Hosting, Storage, Security Rules), Supabase (Auth, Realtime, Storage, RPC Functions).	Networking & Storage: Dio, HTTP Client, Interceptors, Error Handling, Hive, Isar, SQLite, Offline-First, Flutter Secure Storage.
Tools & CI/CD: Git, GitHub, GitFlow, GitHub Actions CI/CD, VS Code, Postman, Claude Code.	Platforms: Android (Google Play deployment), iOS, Windows Desktop, Flutter Web (Firebase Hosting).

COURSES

Flutter & Dart Development Course — EraaSoft

11/2025 – 04/2026

Completed a comprehensive Flutter development course covering Dart programming, UI/UX design, state management using Cubit/Bloc, Firebase integration, clean architecture principles, and building real-world cross-platform applications for mobile, desktop, and web platforms.
